International Workshop of Clusgrid Project in Poland

Barcelona, 2nd October 2018

Last 24th and 25th of September, Clusgrid project consortium met in Eastern Europe Initiatives Congress held in Lublin, Poland. A congress devoted to building of lasting relations within the regional cooperation of Central and Eastern European countries, including issues related to science and education, heritage and reconciliation as well as local democracy.

On this context, Clusgrid project held the International Workshop to present Clusgrid main facts and figures and had the chance to exchange best practices and cluster vision with homologues from different Eastern Countries.

Ewa Rekosz, leader of Clusgrid project from Eastern Cluster ICT presented the main results of clusgrid after nearly two years of implementation. Following her, the rest of the partners of Clusgrid presented their clusters: Patricia Frailes (Cluster CET), Guillaume Roux (Pôle SCS), Dessislava Chalamova (ICS) and Alba Álvarez (Cluster Solartys).

Furthermore, Robert Szlęzak – President of Eastern Cluster ICT and Ukraine delegation lead by Lyudmyla Shyyko – Managing Director from **Precarpathianeco-energycluster (PEEC) from Ivano-Frankivsk, Ukraine** presented Polish and Ukrainian cluster's ecosystem.

After the presentations there was a panel discussion about crucial matters involving clusters such as: Smart Cities, renewable energies, industry 4.0 among others where all the participants had the chance to express their point of view regarding these topics and offer the different approaches to address them in every country.

About CLUSGRID Project

This Study Visit is part of the activities planned within the [CLUSGRID](#) project, whose objective is the creation of strategic alliances of clusters at a European level around the value chain of Smart Grids and to provide them with more and better tools to improve the competitiveness of European SMEs.

About Cluster Excellence program

The Cluster Excellence program aims to create World Class Clusters across the EU by supporting the excellence of clusters. The European Commission launched in 2009 the [European Cluster Excellence Initiative - ECEI](#)

About Solartys – www.solartys.org/en

Solartys, Cluster for the Internationalization and Innovation of Spanish Solar Energy Companies, has been working since 2009 with companies from all over Spain related to the fields of solar energy and energy efficiency. The cluster plays a key role in promoting the internationalization and competitiveness of its members, with the support of the Spanish Government, regional autonomous organizations and the European Union.
